Aviation Skills Masterclass

The one-day Aviation Skills Masterclass will see students working together to operate and manage their own fictitious aircraft. They will learn about the different areas of the six areas of aviation in order to successfully transport passengers and cargo to a specified destination. This will encourage the use and development of aviation related skills such as communication, analysis, research, critical thinking, and team work. We aim to accommodate 40 students*.

Year group: Students aged 14-18 **Duration:** 4.5 – 5 hours

Requirements: Information packs and two ASP staff will be provided.
A 1:16 teacher to student ratio is advised.

*subject to costs.
